A Voyage of Discovery!

Year 6 are launching their home learning project for the rest of this half term. We would like the children to work on one or more projects over this half term. If you need some inspiration, there are a few suggestions below…

Create a poster about how a particular species has evolved other time.	Create a fact file all about evolution and inheritance.	Research Charles Darwin and how his ideas and theories are still relevant today.
Write/draw your own version of 'The Origin of Species'.	Research Alfred Russel Wallace and why he is a famous scientist.	Create a model of HMS Beagle.

There is **no** expectation that children will complete all the tasks, these are just ideas for the children to work on. Projects are due in on **Monday 13th July**.

The children will have the opportunity to share their projects throughout the week and Year 6 parents will be invited in on **Friday 17th July at 3pm** to view the projects across the classes.

We look forward to the wonderful projects that the children bring in. We hope you enjoy the opportunity to show your imagination and creativity! As always, any questions please ask your class teacher. Thank you for your support!
